

Excerpts from an interview with

24hr
Europe & North
America Advanced
Biofuels Summit
2021

13th - 14th April 2021

VIRTUAL

Gunnar Holen
CEO, Nordic Blue Crude

With the Advanced Biofuels Summit coming up, can you give us a brief synopsis of what you will be covering in your session/presentation/ or part of the panel discussion?

I will present the roadmap for NBC to commence production from our first plant and the subsequent roll out of major expansion of capacity. How we secure procurement and off-take, how we work on reducing unit costs and how we secure sufficient new renewable Energy.

What challenges do you think the market is currently facing?

The challenges lie within the framework of legislation and how fast mandatory requirements may be implemented.

What excites you most about the direction that the industry is heading?

There will be a huge market for Low Carbon fuels, this facilitates a great expansion opportunity.
